ADVERTISE WITH GLOBAL MEDIA PUBLISHING

£500 per month
Top Banner 425x60 Pixels

Global Media Publishing Ltd (UK) provides a complete information resource for the Independent power, standby power and cogeneration industries. Through our portfolio of magazines – Worldwide

Independent Power, American Independent Power and Independent Power Asia, the Independent Power & Energy Europe exhibition and Road Shows and our Gen-set Cogeneration Directory (both on line and in print), we are proud to offer a market-leading package and portfolio.

Independent power offers an essential, reliable, realistic and economical solution for vital processes which must be protected from blackouts and power shortages. Distributed power provides increased efficiency and redundancy. Cogeneration, often making use of what would otherwise be waste materials, can provide both power and heating for plants, institutions and districts. These add up to what we see, at Global Media Publishing, as the future of power generation.

That future sees renewable and sustainable energy, such as wind power and bio-fuels, supplementing the more traditional power sources – we aim to bring you the complete picture. Hence our portfolio of publications, exhibitions and directory is unique to the power industry and equally to the independent power, CHP and standby power market.
