The Worldwide Gen-Set & Cogeneration Directory will be distributed in May 2018, brought to you by the publishers of Worldwide Independent Power, a leading global magazine for on-site power and cogeneration. This unique directory will provide you with comprehensive international listings of suppliers and manufacturers within the Independent Power Sectors including: Gen-Sets and CHP related products and services.

19th Edition

The Worldwide Gen-Set & Cogeneration Directory is read by thousands of end users and specifiers worldwide. Established as an indispensable guide, this directory is the ideal companion to help you navigate the year ahead! OEMs or suppliers can be found by simply looking at the product/country listing. As always, there is our on-line version of the directory on our website www.gmp.uk.com ensuring that, wherever you are, the world of Gen-Sets and Cogeneration will always be at your fingertips.

For only £35 you can have your entry in the hard copy edition which will automatically be included on the website and, for a small charge, why not utilise the weblink service at £60 for six months with a further six months FREE OF CHARGE? This will give you a full year's exposure! Also, why not add a logo and a frame around your listing, highlighting YOUR company for only £150 for the entire year?

For £275 you can have your logo in print + online!

To get your listing and additional features fill out the following pages and either post or email back to GMP Ltd (see reverse for details). Alternatively, to add or amend your listing, email us at: powerdirectory@gmp.uk.com
